

PHG COVID-19 Update: May 11

Dear Valued Providers

We want to provide clarification on the provider brief that was sent out on Friday, May 8, regarding the pre-operative COVID-19 testing information.

There is no separate order form for the pre-operative testing. It is the same COVID-19 PCR test that providers have been ordering over the past four weeks. The test is called: SARS COV 2 RNA REAL TIME RT PCR

Outpatient Process

- The physician or designee have the following options for ordering the test:
 - 1. Order within Epic
 - 2. If you have an EMR that interfaces with CompuNet, order test with CompuNet
 - 3. Provide the patient with a paper order to give to CompuNet at a test site
- **Test Name:**
 - SARS 2RNA CL Real Time RT PCR (for preop/elective and outpatient surgery/procedure)
 - Test code 76964
- Patients may schedule at their convenience 48 -72 hours in advance of their procedures at one of the Premier Health urgent care sites or the additional sites listed in the [memo](#).

Yours sincerely,

Renee George
President, Premier Health Group
